

Environmental Policy

Ethoss Regeneration Ltd is the Brand owner and distributor of EthOss a sterile synthetic bone substitute and the distributor of Strauss non-sterile diamond burs for use in dental applications.

We are committed to:

- *Protecting the environment and minimising our impact on it*
- *Ensuring fulfilment of all our compliance obligations*
- *Ensuring good environmental practices are adhered to in all our daily operations, and ensuring the environment is protected from pollution caused through our operations*
- *Reducing waste arising from our activities, and reusing / recycling when possible*
- *Minimise our energy and water usage in order to conserve supplies and minimise our consumption of natural resources, especially where they are non-renewable*
- *Setting objectives and targets to monitor our performance in the use of energy, sourcing from sustainable suppliers and the minimisation of the production of waste*
- *Monitor and maintain our processes to ensure we protect the environment from pollution*
- *Maintaining and continuously improving our environmental management system and performance, through regular appraisal of environmental objectives, thus ensuring continuing enhancement of our environmental performance*
- *Improving awareness and training in relation to environmental protection and performance*
- *Communicating this policy and making it available to the public, our customers and all other interested parties*

Paul Harrison

Joint Managing Director (Operations)
